

Smart Debit Cards

Simplify Employee Reimbursement with a Single Swipe!

Smart Debit Cards were developed with this in mind; to allow your employees to pay for their health care, dependent care, and transit expenses with a card that automatically debits their Smart FSA account for eligible pre-tax expenses without the hassle of claim forms or reimbursement checks.

Your employees can use their Smart Debit Card for goods and services at qualified locations, including:

- Hospitals
- Physician Offices
- Dental Offices
- Vision Service Locations
- Pharmacies
- Daycare Facilities

The Smart Debit Card works like most debit cards with three differences:

- The Smart Debit Card is limited to specific merchants and eligible expenses.
- The card cannot be used at an ATM or for cash back options.
- There is no PIN, employees must select "credit" as the option for payment when paying for items purchased with the card.

Smart Services™ are the result of the collective resource sharing of the Benefit Advisors Network members.
