

Car Emergency Kits

Fact:

Putting out a lightstick can help prevent other drivers from hitting your car while you wait for help.

Fiction:

It's a myth that the car club you belong to can take care of everything. In the event of a natural disaster or a multi-car accident, help may be unable to reach you.

Most people won't get in a car without gas. Too bad they don't consider a car emergency kit as essential.

What You Need

The following items can make a big difference in an emergency, both to drivers and passengers:

- Auto spotlight
- Drinking water
- Duct tape
- Emergency instructions
- Fire extinguisher
- First aid kit
- Flashlight with batteries
